

# Minutes of the Group Meeting

Monday 23 May 2025

## Secretary

Zixuan Li

## Members

Weian Liu, Silin Ren, Daming Chen, Emmanuel Philipose Antony

## Apologies

None.

## 1. Time and Place

The group meeting for the MCI Group Project was held in online(Teams) at 7:00 pm on **Monday, May 23, 2025.**

## 2. Key Discussion

### 1. Test plan

Confirm that the test scope includes registration, search, rating, movie review, AI recommendation, chat box, setting page, etc.

Use Excel to record test cases and defects (test case + defect log).

Currently, black box testing is the main method, and there is no automated tool.

### 2. Settings page vs. user profile page

The settings page is responsible for modifying user information, such as avatar, username, bio, and email address cannot be changed.

The user profile page only displays information and has no editing function. Refer to the Facebook model.

Whether the user profile page displays user movie reviews/collections is still under discussion.

### 3. Watchlist function

The current user data was not successfully written to MongoDB, and the database was not updated after adding a movie.

Emmanuel is debugging the current\_user route and requesting the backend to add an API endpoint.

Silin suggested using a more detailed route instead of the basic information route.

Both parties plan to connect and fix it separately after the meeting.

### 4. Tasks and schedule

All modules must be integrated before May 29 (to prepare for the final submission and customer presentation).

The test team will prepare the report in advance and allow time for repairs.

It is recommended to hold a short meeting on Sunday to confirm the progress and review it before uploading.

### 5. Defect log

Not yet filled in, but the framework has been prepared and is planned to be used in the test next week.

Can be uploaded as an extra point (even if there is no content yet).

Notes:

Prepare for the next group meeting on Friday, May 26, 2025, at 7:00 PM.

Meeting Adjourned: 8:00 PM
