Week 7
Sprint3-Week1-1

The NL1C project's first group meeting this week will be online at 7:00 pm on Monday 28 April 2025.

Agenda

Secretary: Silin Ren
Attendees: Daming Chen, Emmanuel Philipose Antony, Weian Liu, Zixuan Li

1 Apologies
None

2 Task progress report
Frontend development progress
Backend development progress

- Silin:
    1. The completion status of the development of user login, registration and logout functions.
    2. Research and implementation of the POST endpoint and movie rating/review functions.
- Weian & Zixuan: Learning and initial implementation of User Session Management.
- Emmanuel: Settings page development progress.
- Daming: Frontend's other functions.

3 Discussion of issues and obstacles

- The time of the client meeting.
- Database design issues for user authentication and user profile management.
- Problems encountered in the integration of the Movie Rating system and TMDB data.
- Whether the personalization of user profiles (such as avatars and status information) will be discussed as the next development content.

4 The next work arrangement

- Confirmed by the person in charge of developing the Watchlist module.

- · User Profile Management (Improvement of basic data, back-end design).
- · Detailed Design of Movie Rating and Review System (Including front-end and back-end Interfaces).
- · Session management function refinement (timeout, refresh mechanism, etc.).

5 Summary of Decisions

- · Summarize the decided matters
- · Clarify the deadline and person in charge for each member this week.

Note: The Next group meeting will be held on 2 May 2025.
